

The roads from Port au Prince to Cap are destroyed. The rivers become one with the roads. Here is a picture of National Rt #1. Cap Haitien is cut off. Until now, we have no way to bring fuel. All gaz stations are closed. I have not been able to even purchase propane for our stove. So, we have to use wood or charcoals to cook. Today, we had a hard time finding drinking water, because the water treatment plants do not have fuel to operate. We finally found a few bottles from the Culligan plant. Please continue to pray.

Below, Michael is pictured with the orphans

Those beautiful children make our homes their homes. They play with Michael and Matthew. They are very normal, happy. You can see that they feel that they have been blessed. No more sleeping in Mud, no more sleeping on top of roof. We are thank ful that we have been able to reach out to them.
